**Read the passage and answer the questions.**

Whenever I remember the early days of my English language learning, I feel how important to me it was to speak English.

To be honest, at the beginning of learning English, I had difficulty making English sentences correctly. Besides, I couldn't pronounce or understand English words well. Therefore, I joined in an English institute to improve both my speaking and listening comprehension. Also, I spent two hours a day listening to English songs, watching movies with English subtitles and reading short stories. After a while, my English began improving greatly and I really found it easy to communicate with people who could speak English very well.

Finally, I should mention that according to my experience, everyone can learn English easily even if she/he is not young. She/He Should just try hard and believe in himself or herself.

61. She took classes to improve her English. a. True b. False
62. She believes that age is important in learning English. a. True b. False
63. Why did she join an English class?
64. What is her suggestion to everybody?

3

**Good Luck**
