**Read the passage and answer the questions.**

The world around us is full of amazing things. Knowing this beautiful world is very interesting for human. One group of people who study the world are scientists. A scientist studies nature, animals, or people. Scientists work hard and do research to solve problems, find facts or invent new things. Scientists learn about the world by observing and experimenting. There are different types of scientists. Some of them study plants, earth, seas, or animals. Others study people and how they behave and learn. Some scientists like to study history or language. Others are interested in making new things.

They want to make people's lives easier. Some scientists become very famous and rich. Many people around the world may remember their names and faces. But this is not what They call "success" . They feel successful when they solve problems and find answers to their questions.

37. Which one about scientists is true?

- a) Some scientists are interested in history or languages.
- b) All scientists only like to invent new things.
- c) They feel successful when people remember their names.
- d) They try hard to have easier lives and become very famous.

38. There is just one type of scientist in the world.

- a) True
- b) False

39. Scientists observe and experiment to learn about the world.

- a) True
- b) False

40. How scientists solve problems and invent new thing?

.....

41. When do scientists feel successful?

.....
